

Job Completion Report

State of TEXAS

Project No. F-6-R-8

Job No. B-18

Name: Fisheries Investigations and Surveys
of the Waters of Region 8-B.

Title: Basic Survey and Fish Inventory of the
San Antonio River in Region 8-B.

Period Covered:

January 1, 1960 - December 31, 1960

OBJECTIVES

To determine the physical, chemical and ecological conditions and the relative numbers of fish species present in the lower portions of the San Antonio River, lying within Wilson, Karnes, Goliad and Refugio Counties.

PROCEDURE

One and a half days were spent by the Project Leader and two field assistants inspecting several highway crossings of the San Antonio River in the vicinity of Goliad. Only one crossing was found where a boat could possibly be gotten down the bank.

The Project Leader was ill, recovering from surgery, during most of the first half of the segment and almost continuous rains and floods during the second half prevented any further work.

RESULTS

One possible boat landing was found near Goliad. Dry weather over the watershed will be needed to do any field work.

RECOMMENDATIONS

This job should be continued through the next segment of the project.

Prepared by Alvin Flury
Project Leader

Approved by Marion Toole
Director Inland Fisheries Division
